1. The name of the virus when it's genetic material congogates with bacterial ones:

- a)ProPhage
- b)Lytic phage

Answer: a

2. A 6 years old whith meningitis, gram negative coccobacillus what kind of infection he got?

Answer: Heomophils

3. When a bacteria grown in a test tube, it spread all over the tube with aggregation at the top of it, which kind of bacteria?

Answer: Facultative anaerobic

- 4. Anchor peptideoglycan layers to the plasma membrane
- A.Teichoic acid
- B. Lipoteichoic acid

Answer: b

5. The true regarding peptide interbridge The true regarding peptide interbridge

A. D Alanine - 5 Glysene - L lysene

B. I Ala - 5 Gly - Llys

C. D Ala- 4 Gly - L lys

D. L lys - 5 Gly - D Ala

Answer: a

- 6. All the following are true exept:
- A). Episome always found in cytoplasm
- B) Capsule may have antiphagocytic activity
- C) Mesosomes increase surface area
- D) Inclusion body save material
- E) Cytoplasmic membrane the same in gram positive and gram negative

Answer: a

7. Penicillin bind to:

Answer: Penicillin biding protein

8. Scarlet fever cause due to:

Answer: Streptococcus Pyongenes

9. Which of the following written incorrectly: Which of the following written

incorrectly:

Answer: Monoytogenes

10.All the following are true except: A. Russian botanist -- virology B. Redis -- disapproved spontaneous generation C. Robert koch -- animalcules 11.Anntibiotic that inhibit translocation:Anntibiotic that translocation: A. Erythromycin B. Ampicillin

Answer: a

Answer: c

inhibit

12. The final electron acceptor in aerobic respiration: The final electron acceptor in aerobic respiration:

- A. Nitrate
- **B.** Sulfate
- C. Oxygen

Answer: c

13. The vibrio cholerae is: The vibrio cholerae is:

- A. Alkaliphile
- B. Neutrophile
- C. Acidophile
- D. Halophile

Answer: a

14. Which of the following is spore-forming bacilli:

- A.S.aureus
- **B.L.monocytodenes**
- C. C.difficile
- D. C.diphtheriae

Answer: c

15. Which of the following is Scientifically corrected:

- A. haelicobacter Pylori
- B. clostridium botulinum
- C. Yersinia entercolitica

Answer: c

16. The antimicrobial that inhibit binding of amonoacyl-t-RNA to the acceptor site on the 70 S ribosome:

A.Tetracycline

B.Lincosamides

C.Macrolide

D.Amphenicol

Answer: a

17.Bacteria in a dark area and use carbon dioxide as a carbon source:Bacteria in a dark area and use carbon dioxide as a carbon source:

A.Chemoautotrophic

B.Photoautotrophic

C.Chemoheterotrophic

Answer: a

18. One of the following external to cytoplasmic membrane:

A.Mesosomes

B.Capsule

C.DNA

Answer: b

19.Bacteria grow in human bodyBacteria grow in human body

A.Mesophils & neutrophils

B.Mesophils & acidophilus

C.Mesophiles & halophiles

D.Acidophiles & halophiles

E.Acidophiles & neutrophiles

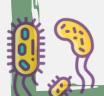

Answer:a

20.Inhibit binding of aminoacyl-t-RNA to the A site in 70s?Inhibit binding of aminoacyl-t-RNA to the A site in 70s?

Answer: Minocycline

21. Have pseudomembrane?

Answer: C. diphtheria

22.All the following is true regarding medical waste exeptAll the following is true regarding medical waste exept

A.Black: for food

B.Red: tissue from infection

C.Yellow: needle

D.Yellow: waste from microbiology lab

E.Blue: chemotherapy products

Answer: d

23. Have central spores? Have central spores?

Answer:Anthracis

24. Gram negative bacteria cause pneumonia? Gram negative bacteria cause pneumonia?

Answer: Legionella

25.Bacteria found in polymorphonuclear cell:Bacteria found in polymorphonuclear cell:

Answer: N. meningitids

26. Example of spirochetes?

Answer: Treponema

27.Can penetrate intestines then go to blood stream?

Answer: S. typi

28.which important thing you should have when deal with patient has influenza

?

A.gown

B.surgical mask

C-gloves

Answer: b

29. Type of plasmid give bacteria nutrients? Type of plasmid give bacteria nutrients?

A.F+ plasmiad

B. F-plasmid

C .resistance plasmids

D.col plasmid*

Answer d

30. Which give copy plasmid?

Answer: Conjugation

31.In the case of E. coli, what is the most effective antibiotic to treat it?

Answer: Ceftriaxone

32.Comma shaped bacteria is considered?

A.aerobe

B.anaerobe

C.alkaliphiles

Answer: c

33.All of the following correct about pilli except:

A.a single bacterial cells bears about 100-200

B.two type

C.amphirichous pili good for attachment

D.the origin is form cytoplasm and penetrate through the peptidoglycan layers

E.Pilli made from protein called pillin

Answer:c

34.In airborne precautions, which one is true:

Answer: Pressure inside is less than outside

35. Which one of personal protective equipments use when deal with patients have tuberculosis?

Answer: N95 mask

36.Bacteria inhabitants of stagnant water:

Answer: Legionella pneumonia

37.Bacteria makes scarlet fever:

Answer: Streptococcus pyogenes

38. Which phage causes hemorrhhagic Which phage causes hemorrhhagic

diarrhea?

Answer: Lambda phage

39.how moments you should wash your hands?

Answer: 5 moments

40.Which bacteria is on-spor

Answer: Mycobacterium which has waxes that prevent Destruction

41.All of the following is true except:

a. Robert Hooke: discovered animalcules

b.pasteur: vaccine concept

c.koch's postulate: one micro bone disease d.botanist launching the field of virology

Answer:a

42. Which of the following is false: Which of the following is false:

- a. O antigen can act as endotoxins
- b. Lipid A stableite outer membrane structure
- c.Lipid A may cause septic shock

Answer: A

43.Comma bacteria is:

- a. neutrophiles
- b. alkaliphiles
- c. psychrophiles

Answer:t

44. Which type of cocci bacteria is cuboidal Which type of cocci bacteria is cuboidal

Answer: Sarcinae

45. Which of the following can cause pseudomembranous Which of the following can cause pseudomembranous

Answer: Diphtheria

46. Which bacteria end with the suffix-ales? Which bacteria end with the suffix-ales?

Answer: Order

47.One of the following is true regarding free radicalsOne of the following is true regarding free radicals

- a. Hydrogen peroxide break down by catalase only
- b. superoxide free radical inhibition by tow enzymes
- c. Hydrogen peroxide break down by peroxide only
- d. Superficial free radical inhibition by one enzyme

Answer:b

48.which generation from cephalosporin treat pseudomonas? Answer: 4th generation. 49.At which temperature extreme thermophiles grow? Answer: 80 and above 50.which of the following correct match: A. Louis Pasteur—>Discovered Mycobacterium tuberculosis B.Redi-> As a tailor C. Ignaz Semmelweis—>discovered hygiene * Answer:c 51. The stage of bacteria growth, in which penicillin works most effective: A. Lag phase B. Exponential phase C. Stationary phase D. Exponential and lag E. Death phase 52. When viral genome integrated with bacterial genome, this process called :When viral genome integrated with bacterial genome, this process called: A. Prophage B. Bacteriophage C. Transduction Answer:a "لم يكن مشغولاً عن يعقوب ولكنه كان يصنع من يوسف ملكاً، لو علمتم كيف يجبر الله القلوب ما دخل اليأس إلى قلوبكم!" لضع أمرك في ودائع الله وقل يارب سلمتك أمري وكل ما أملك فاللهُ وحده

من يقدر على تخفيف حملك و وحده من سيصلح لك أمرّك
