Here's a comparison table of the diseases you requested:

Disease	Cause	Symptoms
Acid Maltase Deficiency (AMD)	Genetic mutation in chromosome 17	Progressive muscle weakness, fatigue, muscle wasting
Carnitine Deficiency	Genetic mutation in SLC22A5 gene	Muscle weakness, hypoglycemia, cardiomyopathy
Debrancher Enzyme Deficiency	Genetic defect in debrancher enzyme gene	Liver swelling, slow growth, low blood sugar
Lactate Dehydrogenase Deficiency	Genetic defect in lactate dehydrogenase enzyme	Muscle weakness, fatigue, exercise intolerance
Myoadenylate Deaminase Deficiency	Genetic defect in myoadenylate deaminase enzyme	Exercise intolerance, muscle cramps, muscle pain
Phosphofructokinase Deficiency	Genetic defect in phosphofructokinase enzyme	Muscle weakness, fatigue, exercise intolerance
Phosphoglycerate	Genetic defect in	Muscle weakness,

Disease	Cause	Symptoms
Kinase Deficiency	phosphoglycerate kinase enzyme	fatigue, cramps
