

White finger syndrome ??

====> worker who use a concrete / asphalt breaker frequently

- Work with hands" below " chest height don't increase stress

- Internal dose don't determined by : ?

water soluble agent

- LD50=> ??

median dose associated with the death of 50% of the population

- Carcinogen haven't safe threshold of exposure

- Thalidomide

=> absence of limbs

- Internal factor causes cancer???

=> hormone

- Not related to engineering controls ??

=> comprehensive employee education and training

- Biologically contaminated protective clothing ???

should disposed / not clean and reuse

- Temperature inversion ???

=> when a layer of cool air is trapped below a layer of warmer air.

- London smog due to ???

burn a greater amount of coal

- Colorless/odorless/highly toxic ???

=> Carbon monoxide (CO)

- Secondary pollutant??

=> not released directly into the air

- Unpolluted rain generally has pH of ?

5.6

- Wrong about distress???

=> achieve at the optimum level of arousal

- Don't share in learning the worker???

=> toxicologist

- not related to hygienic control???

=> good ventilating

- Not related to the capacity of worker to adapt???

=> type of job

*father of occupational medicine ?

bernardino ramazzini .

*wrong about nerves?

treat diseased workers .

*wrong about air pollution?

the most effective measures to control the pollution electrostatic electrode .

* wrong about dealing with animal products?

pest control.

* diseases caused by dealing with animal products?

murine typhus.

* most important measurement control in occupational health?

engineering control.

* benzene permissible ?

5 ppb.

*radon ?

4 PCi/L.

*most important cause of cancer?

Diet.

* wrong about heat stroke?

temperture as low as 98 f.

*wrong about syncope?

skin dry and hot.

*elements of ergonomics?

urban control.

* not air pollutent ?

CO2.

* the variables of ergonomics, except ?

insuranse or non -insuranse .

*permissible exposure level of noise?

90 db .

*wrong about london fog?

due to co2

*not related to organization roles ? dealing with machines

*wrong about the mangement of heat problems?

adequet amount of water in case of thirst or dehydration .

* all about content of work related stress ,except ?

interpersonel relationship .

*all about context , except ?

participation in control .

* all cognitive ,except ?

motivation .

*all emotional ,except ?

attention .
