Raneem Dmour

1-The structure with star is:

- a-trapezius
- b-latissimus dorsi
- c-supraspinatus
- d-pectoralis major
- e-supscapularis

answer:a

2-what is the labelled structure?

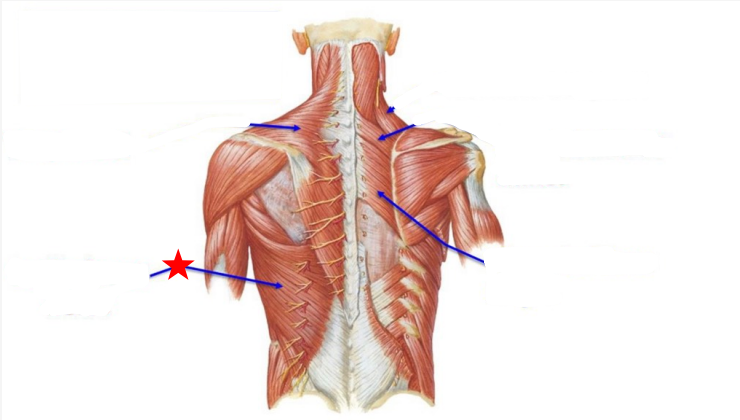

- a-teres minor
- b-infraspinatus
- C-supscapularis
- d-suprasinatus

answer:c

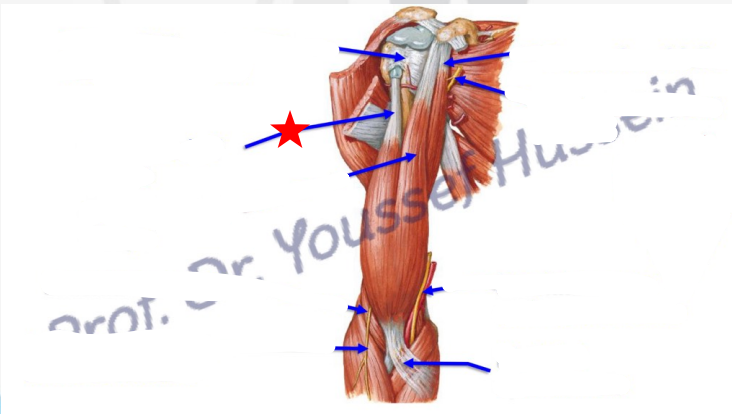

3-The structure with star is:

- a-trapezius
- b-latissimus dorsi
- c-levator scapula
- d-rhomboideus major
- e-deltoid

answer:b

4-The structure with star is:

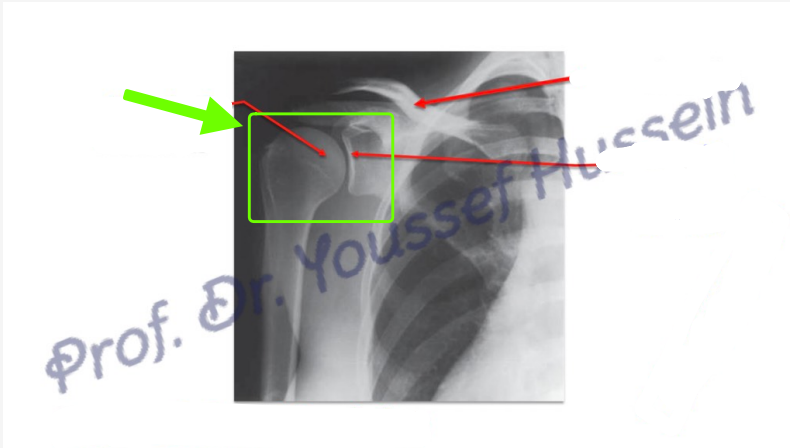

- a-short head of biceps
- b-transverse humeral ligament
- c-coracobrachialis
- d-brachialis muscle
- e-long head of biceps

answer:e

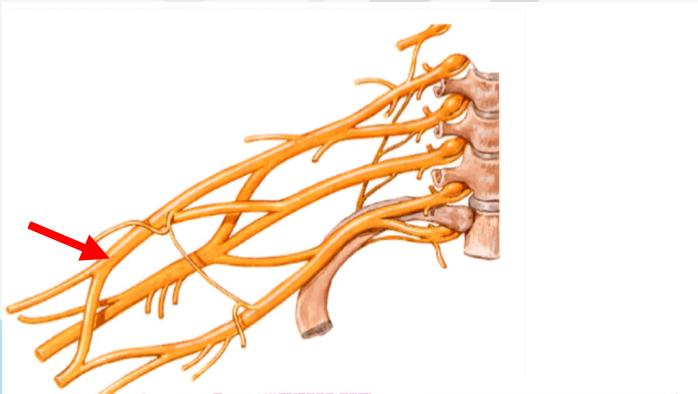

5-what is the labelled structure?

- a-shoulder joint
- b-elbow joint
- c-humerus
- d-hip joint

answer:a

6-what is the labelled structure?

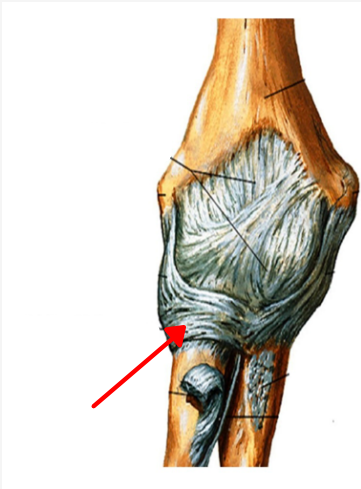

- a-lateral trunk
- b-posterior cord
- c-medial trunk
- d-lateral cord
- e-medial cord

answer:d

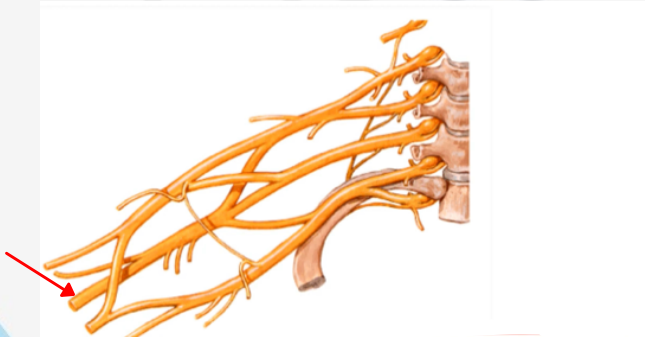

7-what is the labelled structure?

- a-brachialis tendon
- b-anular ligament
- c-radial collateral ligament
- d-ulnar collateral ligament

answer:b

8-what is the labelled structure?

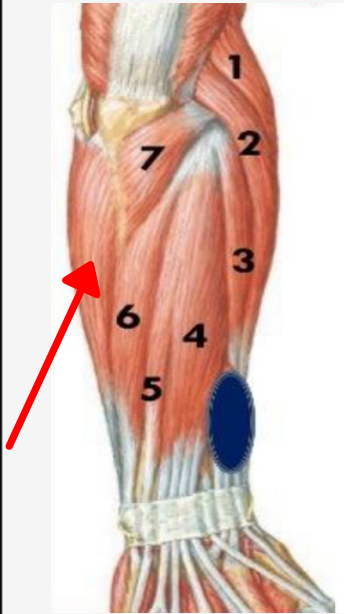

- a-axillary nerve
- b-ulnar nerve
- c-radial nerve
- d-musculocutaneous
- e-median nerve

answer:c

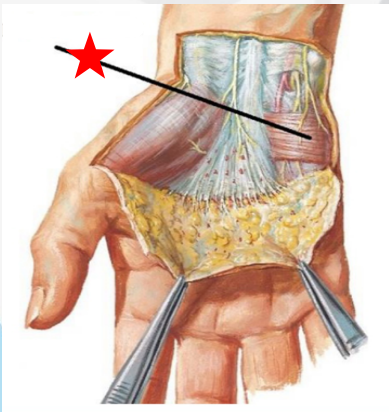

9-what is the labelled structure?

- a-brachioradialis
- b-flexor carpi radialis
- c-extensor carpi radialis longus
- d-flexor carpi ulnaris
- e-extensor carpi ulnaris

answer:d

10-the structure with star is:

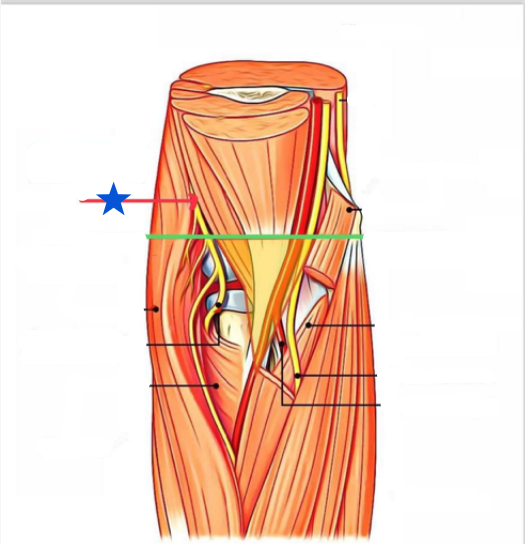

- a-palmaris longus
- b-palmaris brevis
- c-opponens digiti minimi
- d-flexor digiti minimi
- e-palmar aponeurosis

answer:b

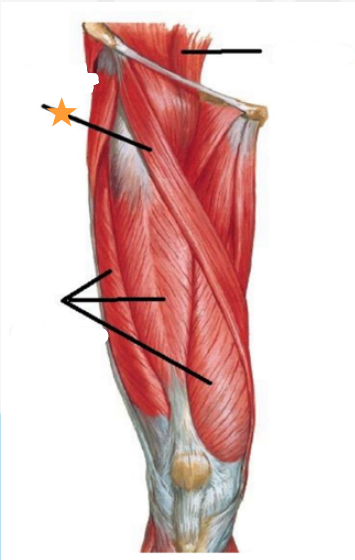

11-the structure with star:

- a-radial nerve
- b-ulnar- never
- c-median nerve
- d-radial artery
- e-ulnar artery

answer:a

12-The structure with star is:

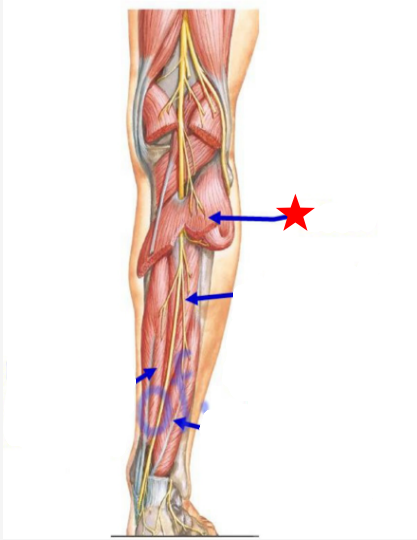

- a-iliopsoas
- b-quadriceps
- c-sartorius
- d-adductor longus
- e-gracilis

answer:c

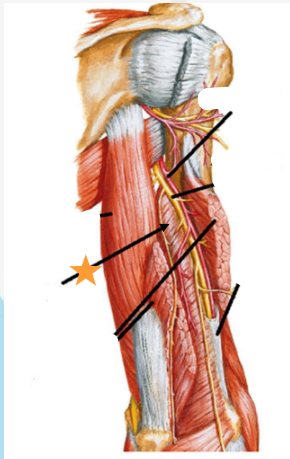

13-The structure with star is:

- a-popliteus
- b-gastrocnemius
- c-tibialis posterior
- d-soleus
- e-plantaris

answer:d

14-the structure with star is:

- a-brachialis
- b-long head of triceps
- c-lateral head of triceps
- d-medial head of triceps

answer:d

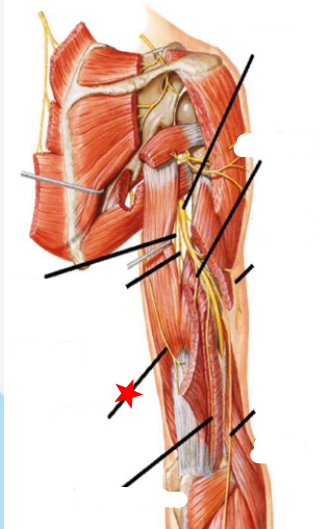

15-The structure with star is:

- a-flexor carpi radialis
- b-palmaris longus
- c-pronator teres
- d-spinator
- e-flexor digitorum superficialis

answer:c

16-The structure with star is:

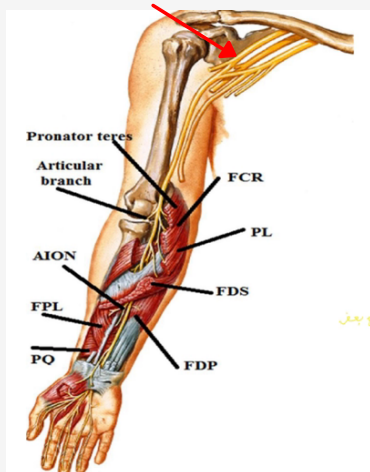

- a-posterior cutaneous nerve of arm
- b-posterior cutaneous nerve of forearm
- c-br to long head of triceps
- d-lower lateral cutaneous nerve of arm
- e-br to anconeus

answer:a

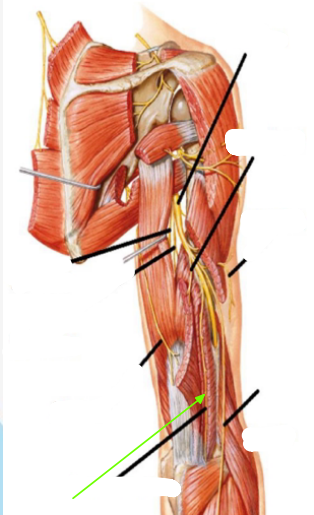

17-what is the labelled structure?

- a-medial cord of brachial plexus
- b-lateral cord of brachial plexus
- c-posterior cord of brachial plexus
- d-median nerve
- e-musculocutaneous

answer:b

18-what is the labelled structure?

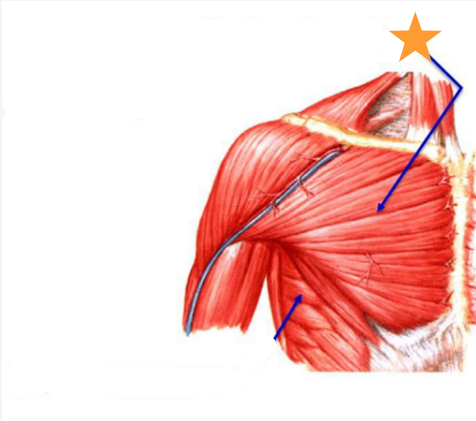

- a-posterior cutaneous nerve of arm
- b-posterior cutaneous nerve of forearm
- c-br to long head of triceps
- d-lower lateral cutaneous nerve of arm
- e-br to anconeus

answer:e

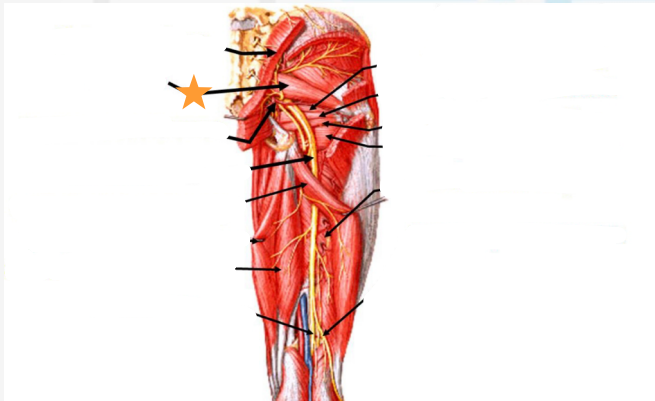

19-the structure with star is:

- a-pectoralis major
- b-pectoralis minor
- c-supclavius
- d-serratus
- e-deltoid

answer:a

20-the structure with star is:

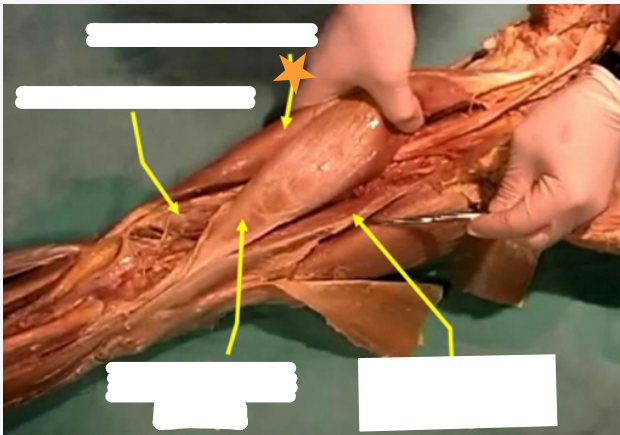

- a-obturator internus
- b-superior gemellus
- c-inferior gemellus
- d-piriformis
- e-quadratus femoris

answer:d

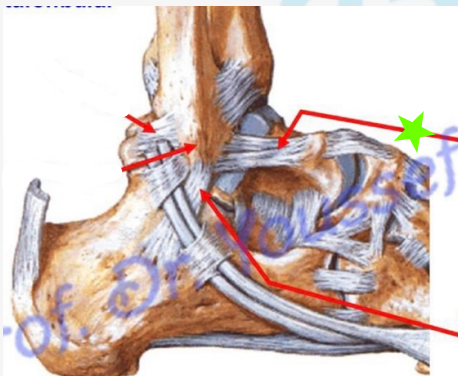

21-the structure with star is:

- a-semimembranosus
- b-semitedinosus
- c-long head of biceps
- d-short Hess of biceps
- e-adductor longus

answer:b

22-the structure with star is:

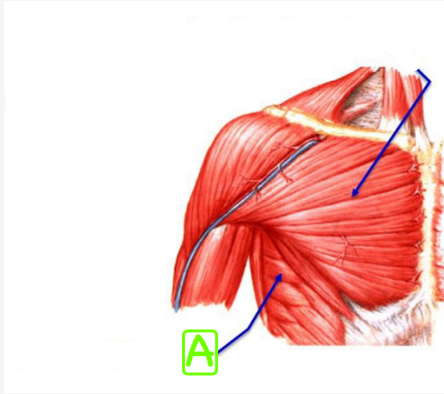

- a-posterior talofibular ligament
- b-calcaneofibular ligament
- c-anterior talofibular ligament
- d-anterior tibiotalar
- e-Posterior tibiotalar

answer-c

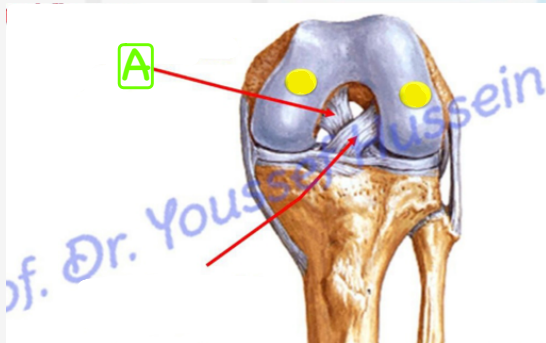

23-the structure A is:

- a-pectoralis major
- b-pectoralis minor
- c-supclavius
- d-serratus
- e-deltoid

answer:d

24-the structure A is:

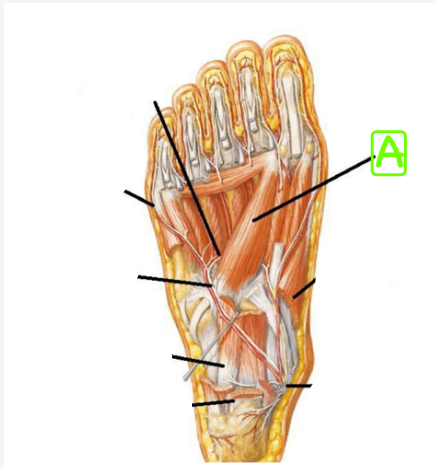

- a-Lateral Collateral ligment
- b-Anterior cruciate lig
- c-Medial Collateral lig
- d-Posterior cruciate lig

answer:d

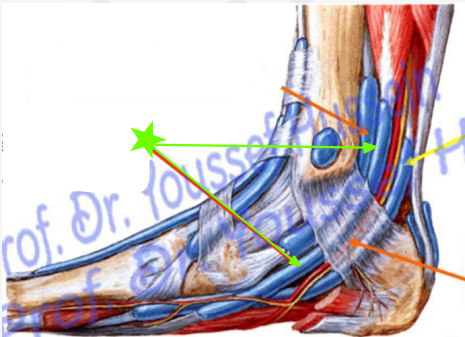

25-The structure A is:

- a-adductor hallucis
- b-abductor hallucis
- c-flexor hallucis brevis
- d-abductor digiti minimi
- e-flexor digiti minimi

answer:a

26-the structure with star is:

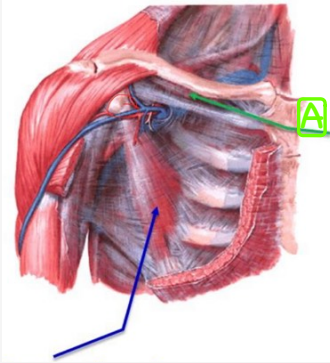

- a-flexor hallucinate longus
- b-flexor digitorum longus
- c-tibialis posterior
- d-flexor retinaculum
- e-posterior tibial nerve

answer:b

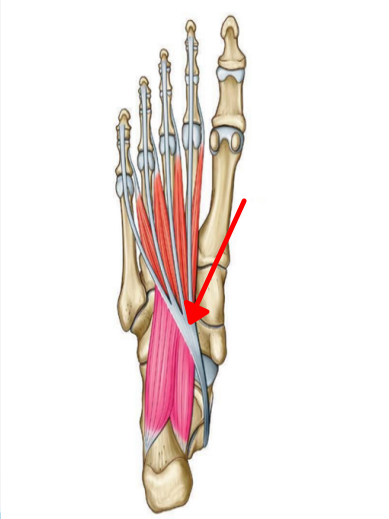

27-the structure A is :

- a-pectoralis major
- b-pectoralis minor
- c-supclavius
- d-serratus
- e-deltoid

answer:c

28-what is the labelled structure?

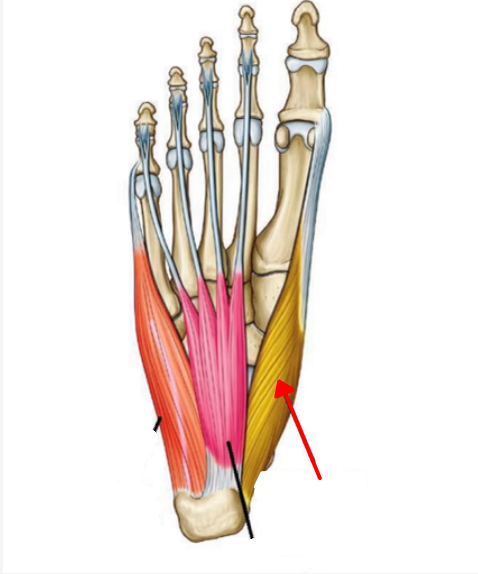

- a-flexor digitorum longus
- b-Flexor digitorum brevis
- c-lumbrical muscles
- d-flexor hallucis longus
- e-flexor digitorum accessorius

answer:a

29-what is the labelled structure?

- a-adductor hallucis
- b-abductor hallucis
- c-flexor hallucis brevis
- d-abductor digiti minimi
- e-flexor digitorum brevis

answer:b
