

OESOPHAGUS

Lec6	oesophagus (in the neck)	oesophagus (in the thorax)
Relation		
Anterior	the trachea the recurrent laryngeal nerves	trachea , left recurrent laryngeal nerve , left main bronchus, the pericardium ,left atrium
Posterior	the vertebral column the vertebral column	the vertebral column the thoracic duct the descending thoracic aorta
Latrally	the lobes of the thyroid gland	Right side: the pleura the terminal part of the azygos vein Left side: the pleura the aortic arc
Blood.S	A. S. :the inferior thyroid artery,descending thoracic aorta,& lt. gastric artery V.D.:Inferior thyroid vein ,azygos v. < gastric vein	
Lymph.D	Deep cervical L.N. , mediastinal L.Ns & coeliac L.Ns	
Nerve .S	parasympathetic and sympathetic ,fibers via the vagi and sympathetic trunks that form oesophageal plexus	

Constrictions:-

- 1-At Pharyngo oesophageal junction
approximately 15 cm
from the incisor teeth
- 2-At Aortic arch
22.5 cm
from the incisor teeth
- 3-At left main bronchus
27.5 cm
from the incisor teeth
- 4-At diaphragm
40 cm
from the incisor teeth

STOMACH
