Embryology'Lecture"1"

1.)What is the origin of parafollicular cells:

- A.1st pharyngeal arch.
- B.Mesoderm.
- C.Neural crest.
- D.Ultimobranchial bodies.

Answer:"D".

2.)Congenital anomaly of craniopharyngial canal due to

- A.Absent of buccal pituitary.
- B.Agenesis of the gland.
- C.Remnants of rathke's pouch that developed into tumor.
- D.Excess ACTH secretion.
- E.Failure of degeneration of rathke's pouch.

Answer:"C".

3.)Origin of suprarenal medulla :

- A.Mesoderm.
- B.Endoderm.
- C.Coelomic epithelium.
- D.Neural crest.
- E.Ultimobranchial bodies.

Answer:"D".
