Lecture 7

Citric Acid Cycle

metabolism-lecture (7)

1) Which of these enzymes is stereospecific:

- .A- Isocitrate dehydrogenase
- .B- G6P Dehydrogenase
- .C- Fumarase
- .D- Pyruvate carboxylase

Answer: C

2) total ATP molecules in the liver

- A) 28
- B) 30
- C) 32
- D) 34

Answer: C
