Lecture 1+2

Done by :

malak al-qadi

fatima Atewi

Anatomy -lecture (1+2)

1. Posterior relation of left adrenal gland, one of the following is correct :

- A- Liver.
- B- lesser sac of stomach.
- C- Pancreas.
- D- Splenic vessels.
- E- Left crus of diaphragm.

Answer: E

2. Superior adrenal artery originated from :

- A - Abdominal aorta.
- B- Renal artery.
- C- Inferior phrenic artery.
- D- Internal carotid artery.
- E- External carotid artery.

Answer: A

3. which structure related to pituitary gland superiorly ?

- A. Diaphragm sella
- B. Intercavernous sinuses.
- C. Cavernous sinus
- D. Dorsum sellae
- E. Sphenoidal air sinuses.

answer: a

Anatomy -lecture (1+2)

4. Which of the following about suprarenal gland is correct :

A. The left gland relates medially to celiac ganglion.

B. the posterior surface of right gland relates to IVF

answer:a

5. Pars distalis is the ?

A) anterior pituitary

B) posterior pituitary

C) infundibulum

D) pituitary stalk

Answer: A

6. Pars nervosa is the?

A) anterior pituitary

B) posterior pituitary

C) infundibulum

D) pituitary stalk

Answer: B

Anatomy -lecture (1+2)

6. Neurohypophysis?

- A) pars distalis
- B) pars tuberalis
- C) pars nervosa

Answer: C

7. Right adrenal gland anteriorly related to ?

- A) body of pancreas
- B) liver
- C) Diaphragm
- D) kidney

Answer: B

8. The pyramidal lobe is connected to the hyoid bone by:

- a. The suspensory ligament of Berry
- b. The levator glandulae thyroidae
- c. Fibrous capsule
- d. Directly
- e. Pretracheal fascia

9. Which of the following's nerves related to the inferior thyroid artery? Anatomy

- a. Internal laryngeal nerve
- b. Superior laryngeal nerve
- c. Recurrent laryngeal nerve
- d. External laryngeal nerve
- e. Vagus nerve

Answer: C

Anatomy -lecture (1+2)

11. A sign that is diagnostic to pituitary Adenoma:

- A muscle weakness
- B) bitemporal hemianopia
- C cold sensitivity

Answer: B

12. All true about surgical anatomy of thyroid, except?

- A) The venous supply parallels to the arterial supply
- B) Parathyroid gland may be inside the thyroid
- C the back of thyroid fixed by Berry ligament to the trachea

Answer: A

13. Nerve related to medial surface of thyroid gland: fratomy

- A- external laryngeal nerve
- B- internal laryngeal
- C- recurrent laryngeal
- D- a&b
- E- a&c

Answer: E

14. The muscles that cover thyroid gland

- A. Sternothyroid, sternohyoid
- B. thyrohyoid & sternothyroid

Answer: A

Anatomy -lecture (1+2)

15. which structure related to pituitary gland superiorly?

- A. Diaphragm sella
- B. Intercavernous sinuses.
- C. Cavernous sinus
- D. Dorsum sellae
- E. Sphenoidal airsinuses.

Answer:A
