

5- Identify the specimen ?

- a. Uterine tube ✓
- b. Vas deference
- c. Prostate

4- Identify the specimen ?

- a. Vas deference
- b. epididymis ✓
- c. fallopian tube

3- Identify the specimen ?

a. Juxta- glomerular apparatus ✓

b. Collecting tube

c. Efferent arteriole

Identify the shown specimen _____?

Select one:

- ☒ a. Testis
- ☐ b. Prostate gland
- ☐ c. Epididymis
- ☐ d. Ovarian follicles
- ☐ e. Lactating mammary gland

Identify the cell type _____?

Select one:

- ☐ a. Mesangial cells
- ☐ b. Spermatogenic epithelium
- ☒ c. Granulosa cells
- ☐ d. Pseudostratified columnar
- ☐ e. Theca interna cells

The lining epithellum of this organ is_____?

Select one:

- ☐ a. Pseudostratified columnar
- ☒ b. Simple columnar partially ciliated
- ☐ c. Simple squamous
- ☐ d. Simple cuboidal
- ☐ e. Trophoblastic cells

Arrow points to _____?

Select one:

- ☐ a. Interstitial cells of Leydig's
- ☐ b. Lymphocytes aggregation
- ☐ c. Granulosa cells
- ☐ d. Principle cells
- ☒ e. Glomerulus
